

NODE RED APPLICATION:

The screenshot displays the IBM Cloud developer console for a NodeRED application. The browser tabs include 'IBM App Development', 'WhatsApp', 'IBM', 'Cloud Foundry - IBM Cloud', and 'IBM Cloud Account'. The URL is 'cloud.ibm.com/developer/appservice/apps/150fb52a-5c03-4fb4-8f68-a9edf147be6b'. The page title is 'Node RED NXYDW 2022-11-08' with an 'Add tags' link. A search bar and navigation links (Catalog, Manage) are at the top. The main content area is divided into three panels: 'Details', 'Services', and 'Deployment Automation'. The 'Details' panel shows the App URL, Source, Resource group, Deployment target, and Created date. The 'Services' panel shows the Cloudant service with links to the dashboard, documentation, and API reference. The 'Deployment Automation' panel shows the Name, Location, Tool integrations, and Delivery Pipelines. A 'Getting started quickly' sidebar on the right provides instructions for configuring the app. The bottom of the screen shows a Windows taskbar with the date and time.

Configuring your app

To connect services and DevOps toolchains to your app:

1. Use the **Services** card to connect a service to your app. Select an existing service instance, or create a new one. [Learn more.](#)
2. If you want to view the code before your app is deployed, click **Download code** to obtain the .zip file.
3. Click **Deploy your app** in the **Deployment Automation** card to select the deployment target and configure the Continuous Delivery service. The deployment begins automatically.
4. After the deployment begins, you can view the status of the deployment, modify your app, view your repo, or view the app's URL.
5. If you make any changes to your app, be
